

who we are

Founded in February of 2003, SecureLink is a privately-held, profitable, debt-free, employee-owned software company based in Austin, Texas.

what we do

SecureLink does just one thing and we do it better than anyone else. We make remote support networks that help enterprise technology vendors support customers in secure and regulated environments.

who uses SecureLink?

SecureLink is used today by more than 15,000 organizations in industries where security, audit and compliance are absolutely required.

top industries:

- healthcare
- financial services
- government
- legal
- gaming
- manufacturing
- education

what vendors say:

"SecureLink provided us with an easy-to-use solution that is faster, more powerful and much more cost effective than our previous combination of customer VPN configurations and a popular desktop sharing provider."

-Rob Hill
Director of Technology & Systems Engineering
Thomson Reuters Corporation

what customers say:

"Before SecureLink, we had vendors crawling all over our network with zero accountability."

-Kay Warner
Security Officer
Medical Center Hospital
